Welcome to The Book of Your Life with

Guruamma Sankalpa.

Welcome to this Connection Gathering

Guruamma Sankalpa is a spiritual guide and a being dedicated to serving universal consciousness. Her work is to facilitate and transmit high-frequency energy for the well-being of those around her.

This space is an invitation to surrender and openness. In her presence, allow yourself to breathe deeply, release tensions, and let the spiritual energy flow into every part of your being, giving you clarity and renewal.

About your meeting (interview or consultation)

This time is exclusively for you.
You can use it to:

Discuss and share about a life situation you are going through to check and review it in your birth chart.

Or simply receive and enjoy the subtle and powerful energy transmission that Guruamma provides.

To make the most of this meeting, we suggest focusing on feeling rather than thinking:

- **Prioritize the feeling:** Avoid falling into purely intellectual conversations; let experience reach your mind through the flow of energy, not the other way around.

- **Full presence:** If you get too caught up in your thoughts, you might miss the essence of the moment.

- **Opening and flow:** Maintain an open attitude and breathe deeply. Let the energy flow to where you need it most at this moment in your life.

- **Trust in silence:** There's no need to give long explanations. Often, the connection goes beyond words.

- **Emotional acceptance:** You might experience spontaneous reactions like crying, laughing, mixed emotions, or energetic movements (kriyas). Don't worry; these are natural processes of cleansing and inner release.

Important:

If Guruamma decides to use her special feather staff during your session, receive it as a gesture of harmonization and energy rejuvenation.

At the end of your session, we recommend staying quiet for a few minutes. This will help you integrate what you've received and reflect on your experience so you can recreate that inner peace in the future when you need it.

To get the most out of your consultation,
I invite you to read the following brief introduction to Astrology.

VEDIC ASTROLOGY*Jyotish*

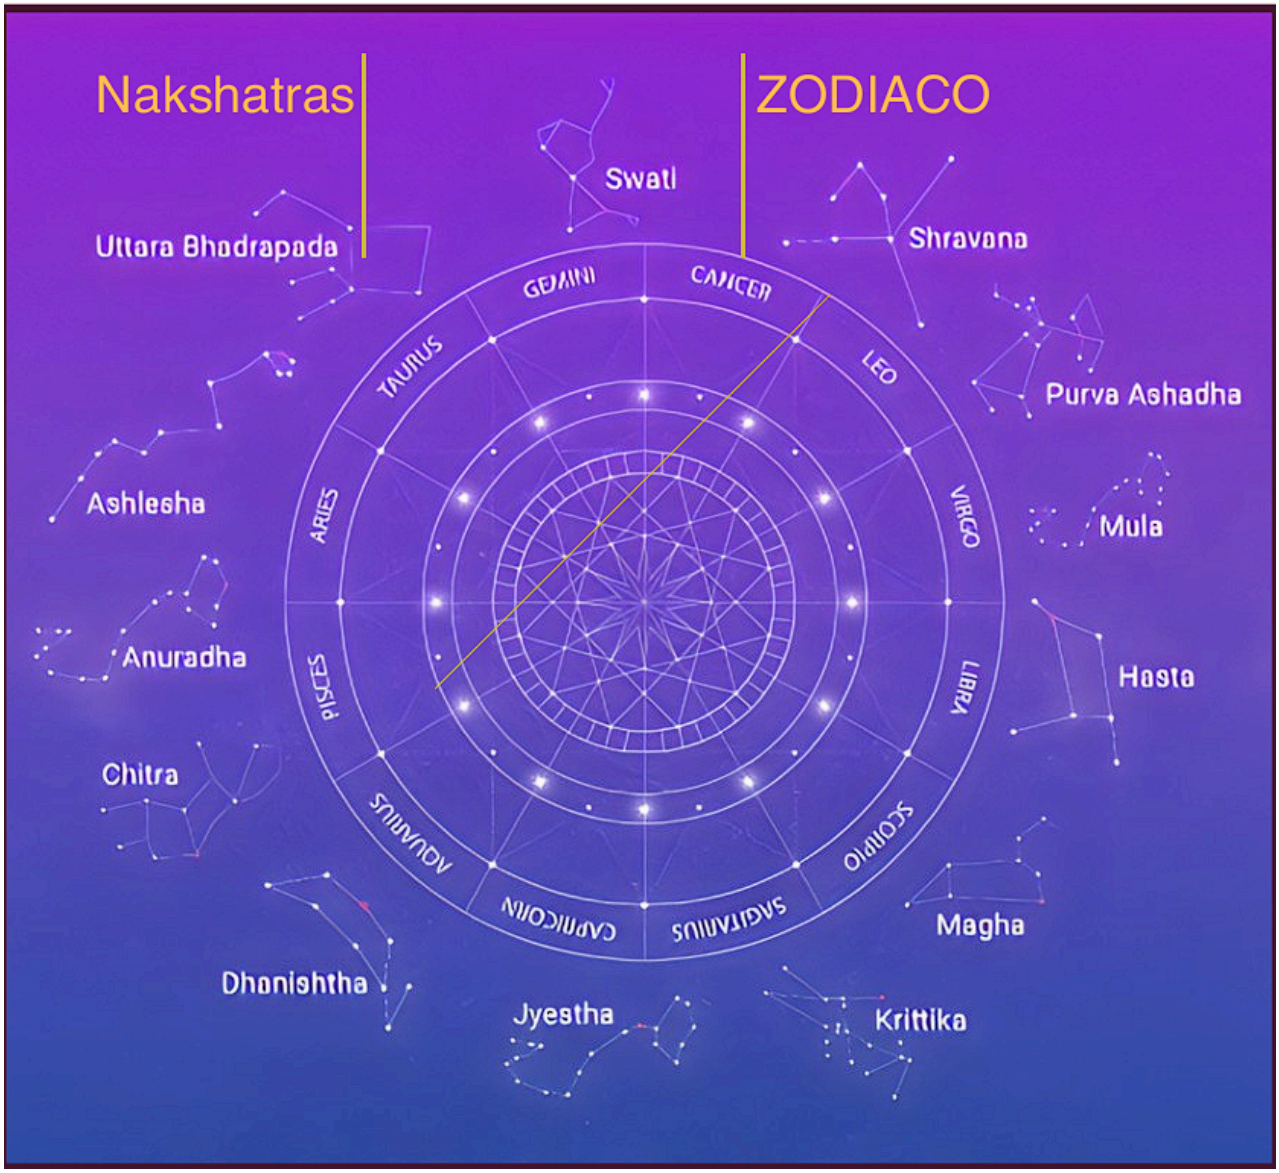
Vedic Astrology, or ***Jyotish***, is considered one of the oldest sciences used to better understand human behavior, our debts as a soul, and our life mission.

We've seen how the sun marks the cycle of day and night, the agricultural cycle, the body's metabolic cycle, etc.

The same happens with the rest of the celestial bodies closest to the earth; each radiates different qualities that impact our brain and body, and therefore our psyche and behavior.

In ***Jyotish***, the effect of the position of the planets, the zodiac, the stars behind the zodiac ***(nakshatras)***, the sun, the moon, and the moon's nodes relative to the earth, known as Ketu and Rahu, at the time of your birth, imprint a karmic map of the soul in this life – what the soul comes to learn and experience.

The following image shows the star map that is taken into account in ***Jyotish*** to read your birth chart:



This star map is divided into 12, forming 12 houses or aspects of the subconscious or your life. The planet that is located in each house at the time of your birth determines the energetic influence on that specific aspect of your life or subconscious.
